WELCOME

The older one becomes the more one realises how quickly time passes. A twenty year period now seems like the twinkling of an eye. Yet, when we were at school, twenty years was a greater period than our individual lifespans. The more time passes the more we are the measure of it.

Through this booklet we hope you'll see how time, like experience, doesn't change us, it merely unmask us. But more than anything, we hope you'll see that fate has forever made us classmates regardless of the effects of the passage of the years.

We got a real buzz out of finding out about what's happened to you all and trust that you'll enjoy the results of our researches.

Good to see and hear from you again. Keep in touch.
